Publishers earn commissions for completed sign ups, trials, and product purchases and can choose campaigns from a diverse variety of niches. Advanced **analytics** and **tools** help you

MONETIZE YOUR WEBSITE

How can I monetize

with a Gateway?

View Online Demo Page

step 1

Educate Yourself!

A Content Locker is a valuable performance marketing tool, it can help you easily and safely lock your website, blog, or any other online media for easy monetization! The best part is, your web traffic doesn't have to spend a dime to make you money! All your traffic needs to do is complete a short survey or offer, and the gateway will automatically unlock after successful offer or survey completion!

FULLY CUSTOMIZABLE

To help you succeed Adwork Media provides its publishers with creative and custom content locker designs! We also allow our publishers to create their own designs so they can match their web content!

Additional information
Give a content locker a try today! It is a revolutionary way to make money online!

step 2

Choose your settings and design options!

When creating a content locker, you will have 4 quick tabs of info to fill in, such as button color, design, size and many more! You will also be able to upload your own designs and select the number of offers and surveys you would like to show.

step 3

Copy your generated code!

After you pick your settings and design options, you will be given a code that you will need to copy and paste into your website code. Don't worry this is a simple step! Look at step 4 for more details!

```
1
2   <script type="text/javascript">awm = false;</script>
3   <script src="http://www.adworkmedia.com/gLoader.
4   php?GID=13&pubID=38&sid=" type="text/javascript"></script>
5   <script type="text/javascript">if (!awm) { window.location = 'http://ad-
6   workmedia.com/help/removeAB.php'; }</script>
7   <noscript>Please enable JavaScript to access this page.  <meta http-
8   equiv="refresh" content="0;url=http://www.adworkmedia.com/help/enableJS.
9   php"></noscript>
10
```

NOTICE:
THE HTML CODE TO THE LEFT IS JUST AN EXAMPLE!

step 4

Paste the code!

Place the JavaScript code below between the <head> and </head> tags (directly before </head> tag) of every webpage the Gateway will be used on. Once the JavaScript has been installed on your web content, it will be 100% operational. Changes made to your Gateway Settings will reflect in real time.

IMAGE TITLE
Adding your code is simple to do! You will see results instantly!

Extra **Information**

The information located here, can help you gain more control and tracking information from your Gateway system.

SID Tracking

The "sid" variable can be used for additional tracking. Enter the sid value after "&sid=" in the code above. By default, sid2 is the Gateway ID and sid3 is "gateway", which signifies the lead is from the Gateway system.

By Default:
- sid2 is the Gateway ID
- sid3 is "gateway"

Launching Gateway on Click

Gateways can also be launched by a user's click, which comes in handy when you have disabled the auto-start option on the Gateway settings. The gLoad() function can be called by the link's onClick function, as seen in the example code below.

```
1   <a href="#" onClick="javascript:gLoad(); return false;">Launch Gateway</
2   a>
3
```

Additional information
Launching a content locker on click is a useful tool when you want your users to be able to navigate away from the screen.

Gateway Support

If you have trouble loading the Gateway then please place the code below before your body close tag (</body>). It is also possible the Gateway is not loading because the IP has been whitelisted, IP has been unlocked, or the "automatic load" setting is not enabled. Please do not hesitate to contact your Affiliate Manager for support.

Additional information
This code does is not nessary for your content locker to work, but it could be helpful if you are experiencing difficulties!

```
1   <script type="text/javascript">
2     gLoad();
3   </script>
```
